HabuOilfield Supply (HOS) was formed in November 2010, with offices and workshop premises at Energiveien 22 in Tananger, Norway. Our business concept is to develop a company within the rental, sale and service of niche products to the oil industry both domestically and globally.

We offer most of what is essential within hydraulic and chemical systems, such as pumps, different metering systems, complementary hoses etc.

In addition we:

- Produce and deliver equipment of high quality, reliability and which provides superior quality and performance
- Build our business around our clients' needs, rather than asking clients to adapt to our specifications.
- Do business where respect, a professional attitude and integrity are key words.

HOS is a subsidiary of Habu Holding AS, a private investment company which, in addition to being the biggest shareholder in Habu's subsidiaries, is also involved in local companies, product development and property in the Stavanger region.

Habu Holding AS has a global presence and is involved in companies in Scotland and the Middle East, mainly in the UAE.

The company's key professionals have long experience and sound competence in the products and services we deliver, which is a requirement in an industry where a high standard of service and delivery is a necessity.

We can deliver:

Service & maintenance

- Hydraulic/chemical/pneumatic & electric pumps & systems
- Gas boosters & test systems
- Flush & control systems
- Pressure testing
- Calibration of instruments

Services

- Rental and sale of pressure and testing equipment, chemical injection, instruments for flushing and pressure testing of pipes and piping systems.
- Personnel hire for onshore and offshore work

Please contact us to find out what we can do for you!
