

COMPANY INFORMATION

Habu Sampling AS

Sampling cylinders are used for storage and transport of fluids to the laboratory.

We design, develop, manufacture, test, service and rent out sampling cylinders for different types of sampling in the oil & gas industry.

Habu sampling cylinders are the most versatile, robust and innovative constant-pressure sample cylinders supplied to the industry.

PRODUCTS

Lightweight piston cylinders and lightweight flow-through cylinders				
Item	Description	Max pressure, psi	Volume	Material
LPC	Low-pressure piston cylinders	3000	600 – 1000 cc	17-4PH
MPC	Medium-pressure piston cylinders	10000	600 – 1000 cc	17-4PH or titanium
HPC	High-pressure piston cylinders	20000	600 – 1000 cc	Titanium
20 L	Sampling cylinder	2900	20 litres	Aluminium
4 L	Sampling cylinder	2900	4 litres	17-4PH

Habu sampling cylinders are the most versatile, robust and innovative constant-pressure sample cylinders supplied to the industry.

RENTAL & SERVICES

We offer a comprehensive range of different types of sampling cylinders for rental. Our workshop is equipped for service, maintenance and repair of all types of sampling cylinders. Cylinders can be leak-tested and pressure-tested up to 30 000 psi.

QUALITY

We have implemented a Quality System in accordance with NS-ES ISO 9001, and our intention is to have the system certified within 2012/2013.

π Habu sampling cylinders are in compliance with the Transportable Pressure Equipment Directive (TPED).

Product Marking
TPED sampling cylinders are marked with the Pi (π) symbol and the identification number of the Notified Body which perform the assessment.

Testing
Every sample cylinder is hydrostatically tested at 1.5 times the pressure rating.

 We are registered in Achilles Joint Qualification System, ID 26535
